### **RESPONSE TO AMENDMENT**

1. Applicant's amendment filed 21 July 2003 is acknowledged. Claims 15-17, 35, 38, and new claims 49-73 are pending and under examination in this application.

#### ***Claim Rejections Withdrawn***

2. The rejection of claim 15 under 35 U.S.C. 101 as drawn to non-statutory subject matter is withdrawn in response to Applicant's amendment requiring that the antibody be isolated.

#### ***Claim Rejections Maintained***

3. The rejection of claims 15-17, 35, and 38 under 35 U.S.C. 103(a) as unpatentable over Chen et al. or Park et al. in view of Harlow et al. or Harlow et al. and Morrison et al. is maintained and applied to new claims 49-73 for reasons of record in the office action of paper no. 13.

Applicant has amended the claims to require that the polypeptide be at least 96% identical to SEQ ID NO: 5 and states that the cited references do not teach such polypeptides.

Applicant's amendment and arguments have been fully considered but are not sufficient to overcome the rejection. As stated on p. 3, Chen et al. does not teach the entire sequence of eek but it is identical to that of SEQ ID NO: 5. The amino acid sequence of a protein is an inherent property of that protein; specifying the sequence does not change the nature of the protein. Antibodies against the protein disclosed by Chen et al. are antibodies against the protein with the sequence of SEQ ID NO: 5. Furthermore, the limitation of at least 96% identity fails to distinguish the instantly claimed antibodies over antibodies against the protein taught by Park et al. An antibody raised against a protein so similar in structure to SEQ ID NO: 5 would also bind specifically to the protein of SEQ ID NO: 5. Thus, for the reasons set forth on pp. 3-4 of the

Art Unit: 1646

office action of paper no. 13, it would be obvious to make antibodies to the proteins taught by Chen et al. and Park et al., and such antibodies would specifically bind to the protein of SEQ ID NO: 5, because the protein taught by Chen et al. is identical to that of SEQ ID NO: 5 and that taught by Park et al. is nearly so.

NO CLAIM IS ALLOWED.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
